1.Applicant's election without traverse of Group II in the reply filed on December 18, 2006 is acknowledged.

2.This application contains claims directed to the following patentably distinct species: (1) the species directed to a biopolymer, and (2) the species directed to the coating of the polymer scaffold or the membrane. The species are independent or distinct because each species involves an element or limitation not common to the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 30, 31, 34, 45-48 and 60-63 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

3.Please check the dependency of claim 48.

4.The members of the Markush group of claims 39 and 54 appear not to be mutually exclusive.
